## CAREER OBJECTIVE

Software Engineer with front-end specialization (React/Next.js) and working knowledge of Node/Express, databases, and REST APIs. Seeking a role where I can contribute across the stack, build maintainable features, and improve product usability and stability.

## EXPERIENCE

➤ Junior Software Engineer | HyperTAG Solutions Ltd. | (January 2025 - December 2025)

**Role:** Lead Front-End Developer

### Key Responsibilities:

- Developing and maintaining user interfaces using **React.js**, JavaScript (**ES6+**), **Tailwind CSS**, Ant Design and **Framer motion**.
- Collaborating with backend developers and UI/UX designers to build responsive and user-friendly web pages.
- Using **REST APIs** to integrate dynamic data and enhance platform functionality.
- Participating in code reviews and **agile** development processes to ensure clean, maintainable, and scalable code.
- Implemented real-time chat and notification functionality using **WebSockets**, handling event-based message exchange and live UI updates in React.
- Used **Redux** for centralized state management and **Redis** for client-side **caching**.
- Implementing new features and optimizing existing components for better performance and usability.
- Troubleshooting and **debugging** issues to improve the platform's stability and user experience.

➤ **Graduate Teaching Assistant** | Daffodil International University | (March 2024 - December 2024)

### Key Responsibilities:

- Assisting in Lab classes and providing support to students who need extra help.
- Assisting industry experts and adjunct professors in preparing lecture materials and managing BLC (Blended Learning Center) courses.
- Providing academic support to students through tutoring and counseling.
- Participating in the development of commercially viable **AI products**.
- Actively engaged in departmental promotional activities through managing social media.

## PROJECTS

- **Belancer** — Multi-vendor Freelancing Marketplace | React JS, Tailwind CSS, Ant Design, Axios, Redux Toolkit  
**Live:** <https://belancer.com>
  - Implemented Project and Gig lifecycle flows (create → publish → manage) with multi-step forms, file uploads, and validation.
  - Implemented real-time inbox/chat for buyer–seller communication using WebSockets.
  - Built order and billing flows (Stripe, SSLCOMMERZ) including eKYC and account security.
- **AdminDash** — Admin Analytics Dashboard | Next.js, TypeScript, Tailwind CSS, Zustand, Recharts  
**Live:** <https://admin-dashboard-ansary.vercel.app>  
**GitHub:** <https://github.com/Khalequzzaman-Ansary/admin-dashboard>
  - Built a responsive admin dashboard UI with KPI widgets, chart modules, and a reusable layout.
  - Implemented interactive analytics (area/bar/pie charts) with global state management and filters (time range, user segment) plus an Export CSV action.
  - Organized the codebase into modular components (layout, widgets, charts) for maintainability and fast iteration.
- **Portfolio** — Personal Portfolio | Next.js, Tailwind CSS, TypeScript, Redux Toolkit (RTK Query)  
**Live:** <https://ansary-portfolio.vercel.app>
  - Built and deployed a responsive personal portfolio website to showcase projects and skills.
  - Integrated a MySQL database (Neon) and deployed on Vercel.
- **Contact Me API** — Backend for Portfolio Contact Form | Node.js, Express.js, PostgreSQL, Neon  
**Live:** <https://contact-api-brown.vercel.app>
  - Developed a backend API to power the portfolio “Contact” section and persist submissions in PostgreSQL (Neon).
